Mass deployment of Lantech Industrial Switches and Converters in MRT lines for IPTV application

IEC-0101FT

June 2008

DVI(Digital Visual Interface) is widely used for Digital Video display like IPTV in modern networks. Lantech Global has won the project of IPTV application in Asia MRT lines to display Advertisement, Scheduling.. information. Lantech Industrial Switch and Converters are installed with DVI switches to connect with IPTV for long haul connection. “We like Lantech IEC-0101FT and IES-0104FT compact design which we can place them in our box, the wide range input power selection is flexible for each MRT station. Particularly the LLF function of IEC-0101FT is very good to alert each MRT station central about the link down via alarm system. Of course, the delivery and service is superb to meet with our project schedule” said S company. The network application for IPTV in MRT is as following:
