LANTECH convergence POE solution enhances South Asia Sub-Station Surveillance Network

JAN,2010

Lantech is successfully delivering convergence POE solutions with *AXIS camera to South Asia sub-station surveillance network. The 2nd biggest power utility company is planning to widely cover their 147 sub-stations, 14 branches, headquarter and warehouses via CCTV and IP surveillance network. They choose to use AXIS in-door, out-door , Day, Night and Speed DOME camera over 1,100 pcs with *Milestone video management software for security and operation purpose. Lantech's total POE solutions including POE splitter, indoor switch and outdoor switch are connected to ensure the network reliability. Lantech POE splitter is customized to split ends to connect camera and fan while Lantech indoor and outdoor POE switches are feeding the power and providing network management capability.

"Lantech POE solutions are chosen over other 3 competitors because Lantech offers total solution for indoor and outdoor applications, which covers 6 models including LPES-2224C-RPS switch, IPES-2208C hardened switch, IPES-0005T-4 hardened switch, IEC-0101FT outdoor converter,CM-011 converter and POS-100 splitter. We like the complete and detail POE information to be shown in the switch itself also the ability to power on/off the camera from central room." Said Mr. S at T company.
